

IN THE CLAIMS:

The text of all pending claims, (including withdrawn claims) is set forth below. Cancelled and not entered claims are indicated with claim number and status only. The claims as listed below show added text with underlining and deleted text with ~~strikethrough~~. The status of each claim is indicated with one of (original), (currently amended), (cancelled), (withdrawn), (new), (previously presented), or (not entered).

Please CANCEL claims 2, 4 and 6 without prejudice or disclaimer and AMEND claims 1, 8, 13 and 16 in accordance with the following:

1. (CURRENTLY AMENDED) An oven having a main body forming an oven compartment, and a door in contact with the main body to open and close the main body, the door comprising:
 - an inner cover facing the oven compartment and having an opening to show the interior of the oven compartment ;
 - a window provided in the opening of the inner cover;
 - a supporting member which supports the window against the inner cover; and
 - the inner cover comprising a window accommodating part which extended
towards the inside of the oven compartment from a periphery of the opening to accommodate
the window, the window accommodating part comprising L-shaped portions including grooves
therein, wherein, such that the window is fittingly inserted into the grooves and contacts
contacting with external boundaries the periphery of the opening of the inner cover and the
window accommodating part,
 - wherein the supporting member comprises:
 - a plate part combined with the inner cover and having an opening part corresponding to the window; and
 - a supporter integrally combined with the plate part and extended from a periphery of the opening part of the plate part toward the inside of the oven compartment which supports the window against the window accommodating part of the inner cover.

2. (CANCELLED)

3. (CANCELLED)

4. (CANCELLED)

5. (PREVIOUSLY PRESENTED) The oven of claim 1, wherein the supporter gives a predetermined pressure to the periphery of the window.

6. (CANCELLED)

7. (ORIGINAL) The oven of claim 5, wherein heat-resisting elastic materials are provided between the window accommodating part and the window; and between the supporter and the window.

8. (CURRENTLY AMENDED) The oven of claim 61, wherein heat-resisting elastic materials are provided between the window accommodating part and the window; and between the supporter and the window.

9. (ORIGINAL) The oven of claim 1, wherein the door further comprises an outer cover which forms an outward appearance of the door outside of the supporting member having an observation window placed corresponding to the window placed in the accommodating part of the inner cover.

10. (ORIGINAL) The oven of claim 9, wherein the supporting member is combined with the inner cover and the outer cover, respectively.

11. (ORIGINAL) The oven of claim 1, wherein the window comprises transparent or semitransparent materials.

12. (ORIGINAL) The oven of claim 1, wherein the window is a rectangular shape.

13. (CURRENTLY AMENDED) A method of assembling an oven door comprising:
~~placing-fittingly inserting~~ a window into a window accommodating part of an inner cover of the oven door, the window accommodating part including L-shaped portions having grooves therein, the window is fitted into the grooves and contacting contacts with external boundaries of a periphery of an opening of the inner cover and the window accommodating part;
attaching a supporting member to the inner cover, the supporting member contacting with the window and securing the window to the inner cover;

adhering the window to the window accommodating part with a supporter of the supporting member being in contact with a periphery of the window; and
combining an outer cover with the supporting member and the inner cover, respectively.

14. (ORIGINAL) The oven of claim 9, wherein the observation window comprises transparent or semitransparent materials.

15. (ORIGINAL) The oven of claim 1, wherein the supporting member further comprises a plurality of bosses which project from the outer surface of the supporting member and through which screws pass toward the inner cover.

16. (CURRENTLY AMENDED) The oven of claim 61, wherein the pressure given to the window is generated when the plate part is combined with the inner cover through screws.

17. (ORIGINAL) The oven of claim 9, wherein the outer cover is combined with the inner cover by screws.
